Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's amendment dated 03/29/2007 has been received and entered. Claims 7-13 are pending in the application. Claims 1-6 stand withdrawn from consideration.
2. Applicant's arguments with respect to claims 7 and 11 have been considered but are moot in view of the new ground(s) of rejection as follow:

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 7-13 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility.

Regarding claims 7 and 11, it appears that the claim invention lacks patentable utility since a liquid crystal display (LCD) device cannot be operated with a dummy cell. In the other word, such claimed invention is inoperative and therefore lacks utility.

In case the Applicant provides evidence of utility, a possible restriction based on intermediate in final product can be applied.

5. Claims 7-13 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

Claim Rejections - 35 USC § 102

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 7-13 are rejected under 35 U.S.C 102(e) as being anticipated by Tashiro et al., US Patent Application Publication No. 2006/0176439 A1.

Regarding claims 7-13, those claims are anticipated by Tashiro et al. figure 80 and accompanying text (example 1) which discloses a member for a liquid crystal display (LCD) device comprising an image display cell (inside main seal 322), a plurality of dummy cells (area between dummy seal 324 and 326)) formed in a periphery of the image display cell (periphery of the area closed by seal 322), wherein both the image display cell and the dummy cell are formed by a similar pixel design (e.g., rectangular with a seal member).

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2871

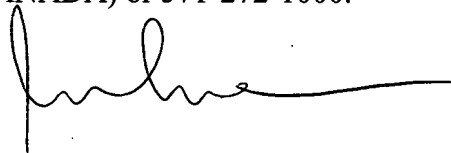

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
